Greetings from Tamil Nadu Ophthalmic Association

It is indeed my pleasure to pen down this message for the souvenir of TNOA. As the president of our association I am very happy and glad to share that this year was very eventful and remarkable, proving the theme "Tamil Nadu Smiling - TNOA Shining". It is my pleasure to also share that TNOA conducted many academic CMEs through webinars which were appreciated and well attended by a large number of members.

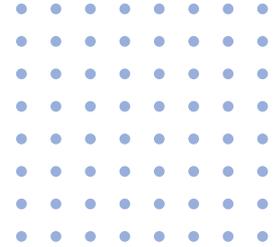

Tamil Nadu Ophthalmic Association and the Local Organizing Committee are conducting KOVEYE, TNOA Conference 2022 which is happening as a Physical Conference with good Scientific and Academic content at a fantastic venue Codissia Trade Fair Complex during 5, 6 & 7 August 2022.

I request all the members to participate in large numbers and benefit from this Conference. I take this opportunity to wish the conference a Grand Success.

Looking forward to seeing you all.
LONG LIVE TNOA

Prof. Dr. Mohan Rajan
President
KOVEYE 2022

Respected Seniors, Colleagues & Friends,

Greetings to all of you!

As an incoming president of our prestigious TNOA, I wholeheartedly welcome all of you to the 69th Annual State Conference KOVEYE – 2022 at Coimbatore on 5th, 6th & 7th August 2022. We have surpassed two years of mental, physical & social agony due to Covid, but the threat still continues. At the same time all of us are very happy & eagerly waiting to see all our friends & colleagues physically after a long time along with academic feast.

The local organizing committee and Coimbatore friends are working very hard & doing all the arrangements to make this conference a memorable & a successful one. Kindly take all precautionary measures to prevent COVID during the conference. I once again welcome all the delegates, friends and trade for KOVEYE 2022.

Dr. R. Ramakrishnan
President Elect
KOVEYE 2022

Dear Colleagues,

Greetings

After two years of restriction and Lockdowns, we are looking forward to our 69th Annual Conference of TNOA, KOVEYE 2022, at Codissia Trade Fair Complex.

The past 1 year has been resplendent with vibrant academic and organisational activities which has been encapsulated in this year's Theme of "Tamil Nadu smiling and TNOA Shining".

With the enthusiastic Dr, D.Sundar, Chairman organising Committee: Dr.J.K.Reddy as organising Secretary: Dr.J.Saravanan, Treasurer and Dr.P.Sathyan as the Chairman Scientific Committee in the helm of affairs and the presence of senior stalwart patrons of CSOS, we indeed are looking forward to a wonderful Scientific extravaganza with a difference.

Request our members to Register early and be part of this historic & memorable 69th TNOA Conference.

Thanking You

Dr. V. Madhavan
Hony. General Secretary
KOVEYE 2022

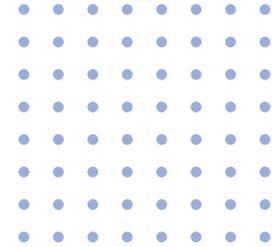

Greetings !!!

It is indeed a privilege to welcome you all, on behalf of the Organizing Committee to the upcoming KOVEYE 2022 – 69th Annual TNOA Conference at Coimbatore, the Cotton City. A known spacious venue, pleasant weather, familiar people, relaxing and religious sites wait to eagerly treat you with the traditional Kongu hospitality. After nearly 3 years, this is going to be a full-fledged physical conference.

It's going to be a great memorable conference to learn, teach, interact and update scientific, academic and practical knowledge. The local organizing committee along with the members of the CSOS have left no stone unturned to make it a pleasant experience.

Please come with family and friends and play an active role in all the events of the conference to make it a grand success.

Thanking You
Dr. Sundar
Organising Chairman

KOVEYE 2022

Vanakkam...Namaste Welcome to KOVEYE2022.

The time the LOC had available was rather limited but no attempt was spared in making the overall experience an unrivalled one for all our delegates.

Continuing our past tradition in scientific content, we have introduced new topics and as the day goes by, you will notice subtle changes which will prove to be welcome additions to the old tradition. New and interesting concepts have been added and some old ones were eliminated.

As for food selection, we have been forced to omit many favorites due to hygiene issues. The "Banquet" has metamorphosed into a "Vibrant Musical Night with Gala Dinner" as Ladies are a dominant force in TNOA.

We were forced to become enthusiastic proponents of the Green initiative as we did not have funds at the beginning. So far, we have not printed a single flyer or even posted one. The usual custom is to send 3 rounds of flyers by courier, 1500 at a time. We saved a lot of money and of course helped our trees. Mother Earth will bless us. Trade partners shall be complimented for their active participation and financial contribution in spite of the far too many conferences post COVID relaxations.

The theme of KOVEYE2022 is "Let us help each other- Let us grow together". It is my earnest hope that all of you teach, learn and enjoy this meeting.

Yours,

Dr. JK Reddy
Organizing Secretary

Greetings to all,

On behalf of the Organizing Committee of KOVEYE 2022, it is my pleasure to invite all the Great experts, Academicians, Young researchers and Residents to attend the 69th Annual Conference of TNOA to be held on 5, 6, 7 of August 2022 at Codissia trade fair complex, Coimbatore.

This conference is special as it is the first post pandemic physical scientific event. We look forward to your active participation and enjoy a great scientific sojourn. KOVEYE 2022 will definitely be an unforgettable experience in exploring new opportunities. Let's gather and celebrate our togetherness with lots of fun and glee.

As the treasurer of KOVEYE 2022, I thank all the delegates, associate sponsors and pharma companies for making the conference a physical reality.

Dr. J Saravanan
Organizing Treasurer

Message From Chairman Scientific Committee

A Warm Welcome & Hearty Greetings from **KOVEYE 2022** Scientific Committee,

It's with great fondness we welcome you all to the grand "KOVEYE 2022", **69th Annual State Conference of the TNOA** at Coimbatore. This would be the first complete offline, live state conference post pandemic and we intend to deliver the best. We have worked our way to present an important channel to exchange information, innovation and academia from multidisciplinary branches of ophthalmology/medicine. I take this opportunity to highlight some of the main events, their target audience and significance in the conference.

Kathambam : A National symposium exclusively by the eminent ophthalmologists from varied specialities from across the country to present their academic expertise and to witness the canon of growth in Ophthalmology.

Connections : Connecting with people, organizations, industries, machines and social media gives an idea of how much you and your organization can gain is thought provoking.

Time Savers : "Time Savers" is a space to present an idea/ protocol/ management skill that improves, incorporates patient preferences, treatment protocols and the management process within an organization. New innovative ideas helps improving quality of Patient-Doctor relation, comfort of accepting a treatment, better understanding of disease management and thus improving the quality of health care.

Pitch - Perfect : A perfect podium for new innovative and novel product developers. It's a space created to exhibit your entrepreneurial-themed concept to the doctors, sponsors and industries. The presenters will get a chance to discuss with the concerned industry representatives in developing new product in our business lounge to take up their product to the next level.

Rapid Fire Rostrum is introduced as an effort for the exam going postgraduates as a paper podium, a non-competitive presentation.

Booth Lectures are introduced in the state conference allowing the industries to showcase their new current or about to launch product(s) and its benefits.

Two Video Assisted Skill Transfer (VAST 1 & 2) courses are aimed for the benefit of general ophthalmology practitioners to improvise techniques in common procedures done in ophthalmology.

A Research-Methodology Session by IJO-TNOA is a symposium prepared by IJO editor for publish and flourish.

Code Blue/ Emergency & Basic Life Support Training: CODE BLUE is a hospital code that allows the staff to quickly communicate the status of a situation with minimal words. A team of non-ophthalmology speciality Doctors who are well versed in emergency medicine will be sharing the practice protocols to efficiently execute code blue in the operating room and the out-patient waiting.

Anger, Anxiety and Depression “ – Get Rid of the Demon” – a PEP talk followed by a practical session by an eminent Psychiatrist.

The above two programs are like a must attend program to all Ophthalmologists.

Eye – I Talks : is a session presented by the key people of industries about the future upcoming's in ophthalmology.

Physical and E – Photography : Hobby-cum-educational sector to exhibit life beyond ophthalmology .

There is an emotion that allows the nucleus of that element to revolve around, like friendship, sharing, meeting one another, exchanging knowledge and experience in the conference and the long await to be wanted in the midst of colleagues, is the heart of KOVEYE 2022. The spirit of debate, best paper awards, PG and general quiz time, pot pourri's, practice management, medico-legal challenges, effective infection control symposia, AI in ophthalmology and many more are intended to bring in the sportsmanship in you to the new world to experience and recognize your skills.

There has been an overwhelming response from the entire state with submission of 528 papers/ posters along with various instruction courses, wet & dry labs and other training programmes.

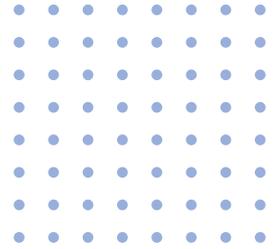

I am thankful to the Local Organizing Committee and Organizing Secretary, Dr. J.K Reddy in confiding this responsibility of scientific sessions in me. I am thankful to each and every member of the scientific committee for their extended help. I would also like to thank Mr.Sai & Mrs.Manjula and their team from the Numerotech for their commitment. Last but not the least, I sincerely thank my Secretary, Mrs. Rajashree for her 24 hours support.

I would like to thank each and everyone whom I have missed out unintentionally.

Once again we welcome you all to cherish our team effort in **KOVEYE 2022**.
Jai Hind!!!

Dr. Sathyan Parthasarathi,
Chairman – Scientific Committee,

CHAIRMAN, SCIENTIFIC COMMITTEE

GUIDELINES TO CHAIRMAN, CO-CHAIRMAN, MODERATOR AND JUDGES

TIME MANAGEMENT :

This is your MOST IMPORTANT responsibility. Please START the session on time. Concluding the session on time is even more important so as not to impinge upon the next session. PLEASE ENSURE THAT YOUR SESSION DOES NOT SPILL OVER INTO THE CHANGE OVER TIME BETWEEN SESSIONS. THIS TIME MUST BE UTILISED ONLY FOR THE NEXT SESSION CHAIRPERSONS TO SETTLE DOWN.

CONFLICT OF INTEREST :

It is absolutely mandatory that in case if you find that in any competitive session where you are a judge and you feel there may be conflict of interest because one of the presentations is by you/ your associate/your family member/your institute please inform the Chairman - Scientific Committee immediately on receiving the information about your session, so that alternative arrangements could be made & you could be assigned elsewhere. WE WANT TO TOTALLY AVOID A PERSON BEING A JUDGE IN ANY SESSION IF THERE IS EVEN THE REMOTEST POSSIBILITY OF CONFLICT OF INTEREST.

OTHER GUIDELINES:

- Once submitted & accepted, 'No change' in authors or topics is allowed in any of the sessions.
- Certificate of attendance in the conference is given by the Local Organizing Committee.

Only E-Certificate will be issued after your presentation at the conference.

- Please follow the order of speakers in the sheet supplied on your table.

Do not allow change in the order of the presentation unless you feel it is absolutely justified.

- Free Paper duration is 6 minutes only (5 mins presentation and 1 mins discussion).

Special sessions for this conference may have a difference timings as announced earlier.

- Kindly indicate the Paper presenter's name in the mark sheet.
- Indicate your marks in the given mark sheet (per 100). Marks are for Content, Presentation, Slides & Originality (25 marks each).
- At the end of session, please calculate the total marks of each paper and the highest mark will be the BEST PAPER IN YOUR SESSION.

Please indicate the Best paper in the mark sheet clearly and also announce the same at the end of the session. PLEASE ENSURE THERE ARE NO ERRORS IN CALCULATIONS OR PROCEDURE FOLLOWED.

- The result announced is subject to ratification by the Scientific Committee office.
- If the presenting author is a non-member or a non-ratified member, DO NOT EVALUATE that particular paper/e-poster/video because they are not eligible for any AWARD. Hence, before announcing the result, please see whether the Presenting author is a ratified member.
- Please don't go out of the hall in between and switch off your mobile phone during the session. Kindly concentrate on each presentation so that justice will be done.
- Don't consult the marks with other judges. We want your individual evaluation.
- Please mark whether all the Free papers were presented. If there is any absentees (including other judges), please indicate in the mark sheet clearly as “absent” without fail. Don't forget to write your name in Capital letters with mobile number in the marks sheet and sign.

CATARACT			
DAY 1: 5th AUGUST, 2022 (FRIDAY)		TIME : 09.00 - 10.00 AM	HALL : A
IC NO	IC 46		
TITLE	Manual Small Incision Cataract Surgery in Challenging Situations		
CHIEF INSTRUCTOR	Dr. Shivkumar Chandrasekaran [S1387] - Thirunelveli		
SYNOPSIS	Cataract surgery, today, is considered a refractive surgery, and phacoemulsification is the procedure of choice for almost all types of cataract and all grades of nuclear sclerosis. However, there are certain situations and certain types of cataract which require a high degree of skill, adjuvants and advanced phaco machines to perform the procedure safely and effectively. In those challenging situations, Manual Small Incision Cataract Surgery (MSICS) can be safely performed providing a satisfactory outcome to the patient. In this course we aim to present tips on performing MSICS in a few challenging situations like in small pupils, brunescant and mature cataracts, traumatic cataracts, and Lens Induced Glaucoma

DAY 1: 5th AUGUST, 2022 (FRIDAY)				TIME : 11.00 - 12.00 NOON		HALL : D	
IC NO	IC 54						
TITLE	EVALUATION OF STRABISMUS: NOT AS SCARY AS IT SEEMS						
CHIEF INSTRUCTOR	Dr. Kavitha Kalaivani [K1640] - Chennai						
SYNOPSIS	Strabismus evaluation starts with history taking onwards. We by this alone can come to a differential diagnosis ,prognosis, pattern of evaluation and management to a great extent. Sensory and motor evaluation always follows history taking. Depending upon the age group and the cooperation level of the child certain tests cannot be performed. The instruction course covers evaluation of strabismus beginning from evaluating ocular movements to checking fixation patterns, understanding types of strabismus and how to differentiate between the various types by means of simple tests like Hirschberg corneal reflection test, Bruckner's test ,cover-uncover test, Prism bar cover test, modified Krimsky test. Evaluating a child with strabismus being a dynamic process is always a challenge .Perseverance and patience is the key to success in the form of attaining a cosmetically acceptable near orthophoric ocular alignment resulting in reasonable binocular vision

IC NO	IC 66						
TITLE	CONGENITAL GLAUCOMA - AN A TO Z COMPREHENSIVE GUIDE						
CHIEF INSTRUCTOR	Dr. Sathyan P [S707] - Coimbatore						
SYNOPSIS	Congenital glaucoma is a major problem and poses a diagnostic and therapeutic challenge. A detailed evaluation under general anesthesia is advisable to establish the diagnosis and plan for management. Medical therapy has a limited role; whereas surgery still remains the primary therapeutic modality. While goniotomy or trabeculotomy ab externo is valuable in the management of congenital glaucoma, primary combined trabeculotomy–trabeculectomy offers the best hope of success in advanced cases. Glaucoma drainage devices & cyclodestructive procedures has a role in the management of refractory cases, and should be reserved for patients where these procedures have failed. Early diagnosis, prompt therapeutic intervention and proper refractive correction are keys to success. Management of residual vision and visual rehabilitation should be an integral part of the management of children with low vision and lifelong follow-up is a must. This IC cover all the above in vast detail for neophytes

IC NO	IC 15		
TITLE	UNEXPLAINED VISUAL LOSS- UNTYING THE GORDIAN KNOT		
CHIEF INSTRUCTOR	Dr. K. Srikanth [S508] - Cuddalore		
SYNOPSIS	<p>The common problem faced by ophthalmologist is unexplained vision loss. Contrary to expectations, is a fairly frequent occurrence. There are various causes for these and also various clues to diagnose them clinically. To identify the cause and institute appropriate treatment calls for a high degree of clinical acumen aided by relevant investigations to unravel the cause. There are various anterior and posterior visual pathway clues which is of importance in aiding the clinician to arrive at the cause. This course will highlight the various causes of unexplained vision loss, importance of clinical examination and appropriate method to confirm the diagnosis. This course will also describe various anterior and posterior visual pathway lesions and clues to diagnose the condition. It will also guide in the proper approach to a neurological case</p>

DAY 2: 6th AUGUST, 2022 (SATURDAY)		TIME : 08.00 - 09.00 AM	HALL : D
IC NO	IC 07		
TITLE	MANAGING DIPLOPIA IN EVERYDAY PRACTICE: TAKING THE DOUBLE OUT OF DOUBLE TROUBLE		
CHIEF INSTRUCTOR	Dr. Muralidhar R [M977] - COIMBATORE		
SYNOPSIS	<p>The session starts with an introduction to diplopia evaluation amply illustrated by examples from the clinic – differentiating monocular from binocular diplopia, the basic evaluation of binocular diplopia, hess and diplopia charting, measurement of deviations in cardinal gazes to arrive at a diagnosis. Every effort will be made to provide information of value to the general practitioner. 3rd, 4th and 6th nerve palsies are covered next illustrated by videos. To follow is a review of ocular myasthenia and ocular myopathies with videos illustrating various presentations. Non-neurogenic causes of diplopia come up next which include disorders of the ocular media, and orbit. An attempt will be made to mitigate unnecessary referrals. The non-surgical and surgical management of paretic strabismus is covered next illustrated by surgical videos. Newer surgical options to manage paretic strabismus are discussed/ Non –neurogenic will be touched upon with examples from the clinic</p>

DAY 2: 6th AUGUST, 2022 (SATURDAY)		TIME : 08.00 - 09.00 AM	HALL : E
IC NO	IC 51		
TITLE	ALL ABOUT DRY EYE DISEASE AND ITS MANAGEMENT		
CHIEF INSTRUCTOR	Dr. Josephine Christy S [J2001] - Pondicherry		
SYNOPSIS	<p>Dry eye disease (DED) is a growing public health concern that affects both the quality of life and visual function resulting in a significant socio-economic impact. If the innate immune response is unable to cope with internal bodily or environmental adverse conditions, the persistent, self-maintaining vicious circle of inflammation leads to the chronic form of the disease. A proper diagnostic approach is crucial to define the main pathogenic factors such as tear film instability, epithelial damage and inflammation. With the armamentarium of novel investigations available, it's essential to be aware of the appropriate tests to be done. Treatment should be aimed at tackling all factors that maintain the vicious circle of DED and possibly treated simultaneously. Also its important to remember that the treatment should be long-lasting and personalized as it has to be adapted to the different clinical conditions observed along the course of the disease</p>

IC NO	IC 19		
TITLE	ACHIEVING ADEQUATE PUPIL DILATION IN CATARACT SURGERY		
CHIEF INSTRUCTOR	Dr. Chockalingam M [C859] - Porur, Chennai		
SYNOPSIS	Cataract surgery is the most common surgical procedure performed worldwide. Small pupils have been an eternal challenge for cataract surgeons. Insufficient pupil dilation is associated with increased complication rates, including capsule rupture, vitreous loss, iris trauma and postoperative inflammation. There are various risk factors for intra operative small pupil. There is a wide range of options to manage small pupil like pharmacological treatment, mechanical stretching and dilation with pupil expanders. Every cataract surgeon needs to be ready to cope with a small pupil, both manifesting preoperatively and intraoperatively. This Instruction course discusses the risk factors for a small pupil, methods to achieve ideal pupil dilation in a cataract patient

IC NO	IC 50		
TITLE	BEST KEPT SECRETS TO RETAIN YOUR CATARACT SURGERY PATIENTS		
CHIEF INSTRUCTOR	Dr. Santhiselvan [S753] - Erode		
SYNOPSIS	Retaining the patients with us to undergo the surgery in our hospital and enhancing the cataract surgical rate is a major challenge. It is faced by everyone in this modern era. The old ways of patients' loyalty is gone out of vogue. Google online reviews, social media impact, corporate cultures, insurances, visual media, digital advertisements are some of the influences over the patients in choosing their doctor. In this scenario what a practitioner can do to retain his patients? How are we going to hike up the percentage of surgical rates? It will be a panel discussion on different strategies in patient retention. We have experienced ophthalmologists from varied set up - private hospital, government hospital, institution, multi speciality hospital who will voice their proven patient retention strategies. The moderator will extract the key essence of their successful practice. The discussion is structured to show promising ways to win and retain patients and revenue

VITREO RETINAL DISEASES			
DAY 3: 7th AUGUST, 2022 (SUNDAY)		TIME : 09.00 - 10.00 AM	HALL : E
IC NO	IC 52		
TITLE	CONCEPTS AND CLINICAL APPLICATIONS OF CHOROIDAL IMAGING		
CHIEF INSTRUCTOR	Dr. Thanikachalam S [T1052] - Pondicherry		
SYNOPSIS	The role of the choroid had been well discussed in diseases of the pachychoroid spectrum like central serous chorioretinopathy, polypoidal choroidal vasculopathy, AMD, and choroiditis. In predominantly retinal diseases like Diabetic and Hypertensive Retinopathy, the choroidal changes are largely unknown. Imaging of choroid and measurements of choroidal thickness have enabled newer concepts and clinical applications in systemic disorders. Our Instruction Course aims to use Enhanced Depth Imaging Optical Coherence Tomography (EDI-OCT) of the choroid to answer the question on the importance of Choroidal Imaging in systemic and retinal Diseases.

GLAUCOMA			
DAY 3: 7th AUGUST, 2022 (SUNDAY)		TIME : 12.00 - 01.00 PM	HALL : D
IC NO	IC 16		
TITLE	DRIVE EFFICIENTLY IN MULTILANE ROADS – KEEP GLAUCOMA ASSOCIATED WITH MULTISPECIALITY PROBLEMS AT BAY		
CHIEF INSTRUCTOR	Dr. Mohideen Abdul Kader PMT [M919] - Tirunelveli		
SYNOPSIS	Managing secondary glaucomas is always a greater challenge to the glaucoma specialist. The need for medications like steroids has to be carefully balanced against the maintenance of Intraocular pressure. With the emergence of multitude of procedures in other specialties like DMEK ,DSAEK and the ever-increasing number of vitreoretinal procedures and refractive surgeries, the challenge of keeping the intraocular pressure and the disease progression under control has become a mammoth task. This course aims to explore the hurdles faced by the glaucoma specialist while managing such complex situations and how to overcome the difficulties and balance the multispeciality management

PEDIATRIC OPHTHALMOLOGY & SQUINT

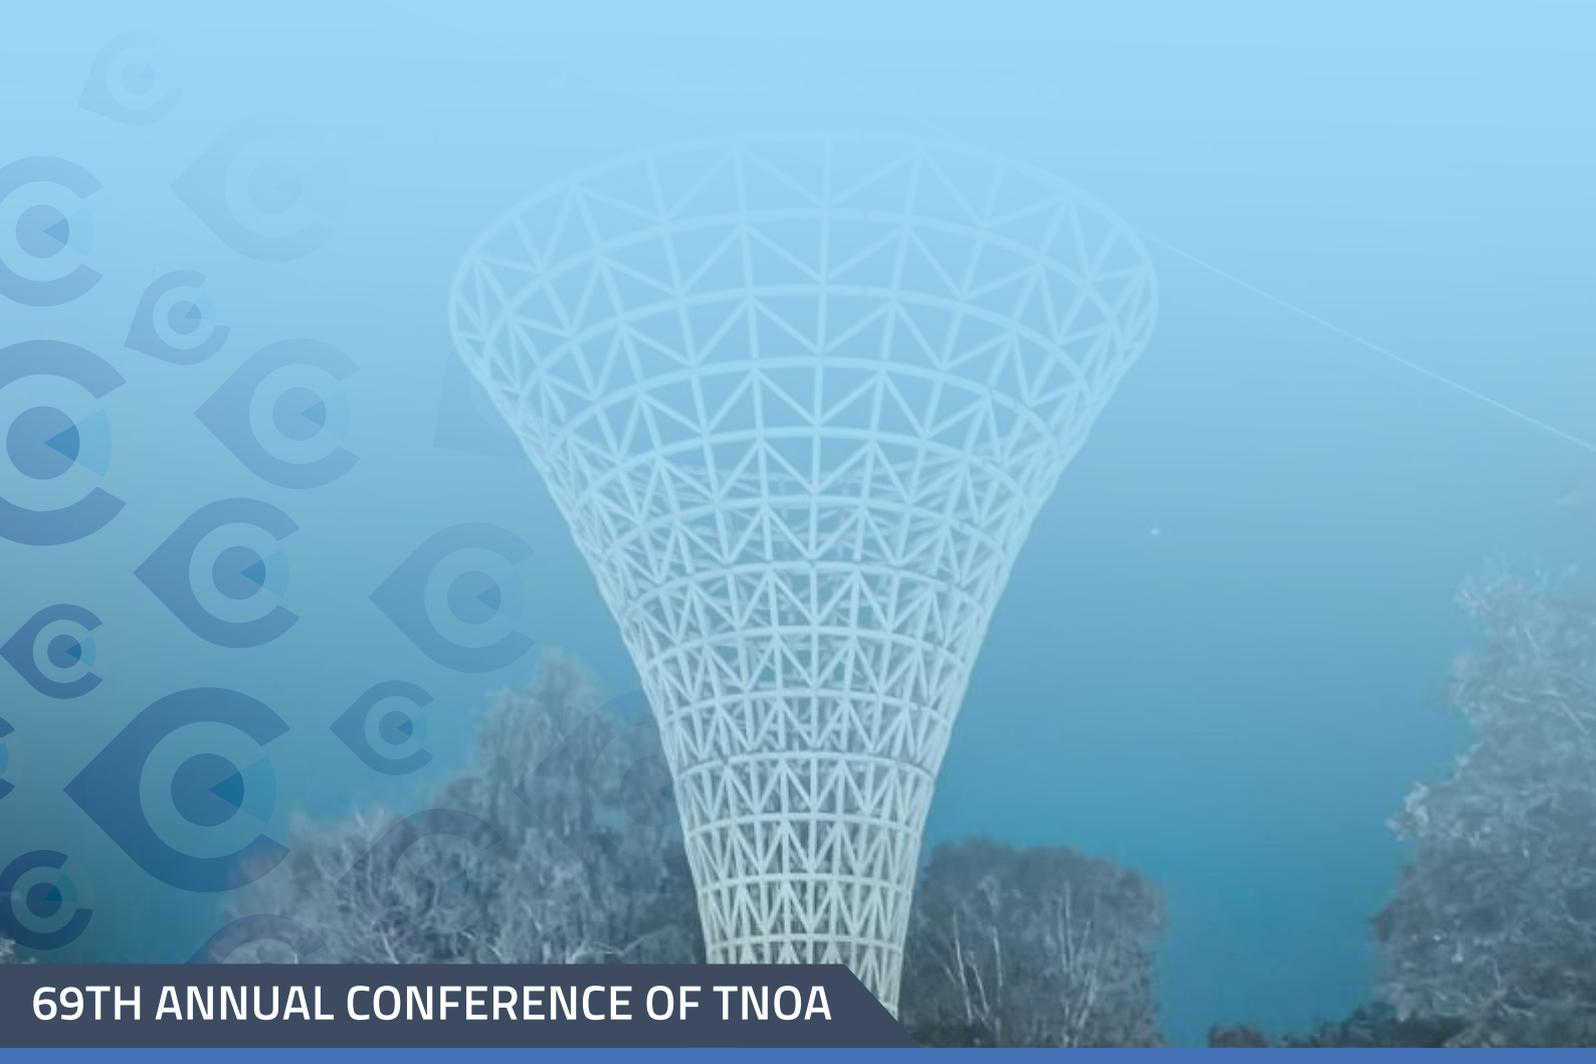

DAY 3: 7th AUGUST, 2022 (SUNDAY)

TIME : 12.00 - 01.00 PM

HALL : E

IC NO	IC 29		
TITLE	SIMPLE TO COMPLEX STRABISMUS: AN OVERVIEW		
CHIEF INSTRUCTOR	Dr. R. Meenakshi [M917] - Tirunelveli		
SYNOPSIS	<p>Managing a case of squint is hardly a child's play. Given the variations in presentations and the nature of the disease, a strabismologist has to factor in multiple considerations before zeroing on a treatment modality for a patient. This instruction course is aimed at providing an overview of various interventional modalities in treating a case of strabismus, be it simple or complex. The armamentarium of a strabismologist is ever expanding; the authors with their vast experience shall throw some light on appropriately using one's tools while deciding on management of a case of strabismus.</p>
